Les fruits déguisés sont partout aujourd'hui et de toutes les manières. Les fruits de l'agriculture contemporaine sont aujourd'hui, après avoir été apprivoisés. Loose tongues a la Prawer The IAC report on the Prawer Plan has been released. The Prawer Report, in short, is here, and the Prawer spin is here. A study on the Economic, Social and Cultural Plan for the Negev Bedouin community that some in the media have already dubbed the "Prawer Plan" was released on July 2nd. The IAC report will be discussed at the Hula Council meeting in August. Some in the media say the report is a "sub-report", based on a very small sampling. The IAC reports are a community-based, representative approach to studying the situation. The IAC report clearly highlights that the Negev Bedouin community needs to make improvements in five aspects of their lives in order to improve their quality of life. Education is emphasized as a critical factor in maintaining a community's culture. The report stresses that this aspect must be developed in every village. The IAC is worried about how the Negev Bedouin will be able to maintain their culture when they are scattered across the Negev. The report stresses that real developmental and security policies need to be created for the Negev Bedouin. The report says this is not a question of "giving the Negev Bedouin who are preparing to argue their case in court. I will address that aspect in a separate post. Let's all try to keep our mouths shut. This is the place where you debate issues, not gossip. If you have anything you want to say to the Prawer supporters on these issues, do it on this post. 22 Responses to Loose tongues a la Prawer You 82157476af
